-

Skills •

Programming Languages: JavaScript | Python | Swift

- Frameworks & Libraries: React | React Native | Node.js | Express
 - Databases & APIs: MongoDB | Stripe API | Google API | MPESA Daraja API | SWIFT Code Integration
 - Tools & Technologies: Git | MVC Architecture | RESTful APIs | SAP Software | Server Management
-

Work Experience

Kenya Power and Lighting Company (KPLC), Nairobi, Kenya | Software Engineer Intern | 06/2022 – 12/2023

- SAP Software Management: Configured and maintained SAP systems for internal operations, improving data processing efficiency by 20% for 50+ employees.
 - Software Installation: Installed and tested company software across 10+ departments, ensuring 100% uptime and compatibility with existing systems.
 - Server Management: Monitored and managed servers to support critical applications, reducing downtime by 15% through proactive maintenance and updates.
-

Education

BSc in Computer Science and Information Technology, 2024

The East African University, Nairobi, Kenya

- Key Achievements: Developed multiple full-stack projects integrating third-party APIs for payment and booking systems. Mentored peers in React Native development through Perform Academy.
-

Projects

City Swift | github.com/lunani254/city-swift

- Car Booking Platform: Built a React-based application with Google API integration, enabling users to book cars with accurate location tracking and transparent transactions for 500+ users.

Cryptomania | github.com/lunani254/cryptomania

- Cryptocurrency Trading Platform: Developed a React application with Stripe API integration on a Node.js backend, allowing users to buy crypto via third-party offers with secure payment processing.

Bank Management | github.com/lunani254/bank-management

- Online Banking System: Created a React-based platform with SWIFT code integration, enabling users to access banking services and process international payments seamlessly.

Matter Familia | github.com/lunani254/materfamilla

- Client Management System: Designed an MVC-based application with role-based access (admin, employee, client), allowing clients to donate, pay, and complete questionnaires while admins manage operations.

Rhema | github.com/lunani254/rhema

- Online Church System: Developed a React Native app with MPESA Daraja API integration, enabling church management, payments, and donations for a community of 1,000+ members.
